WORKING EXPERIENCES

TITANICOM TECH (MALAYSIA) SDN BHD | Jul 2026 — Present

Operation & Maintenance Engineer

- Coordinate with team members to identify issues, resolve tickets, and troubleshoot faulty devices.
- Provide onsite support for device (switch & server) maintenance.
- Participate in onsite project implementation, including installation, cabling, switch configuration, and acceptance testing.
- Coordinate with vendors and support teams on technical problem resolution and implementation issues.
- Prepare project documentation in advance, including configuration scripts, cable connection tables, and project/service acceptance reports.

Ensign InfoSecurity | Sep 2025 — Mar 2026

Security Analyst Intern

- Daily Tasks: Performed system health checks on client devices and monitored website availability.
- Monitored and analyzed security logs for 30 clients using IBM QRadar to identify recurring incidents.
- Utilize Palo Alto XSOAR to create and manage incident tickets for clients.
- Assessed and determined whether incidents required escalation to Level 2 SOC support.

PKT(M) LOGISTICS SDN BHD | Sep 2022 — Feb 2024

Software Programmer (Part-time)

- Create a new app with PowerApps, SharePoint and Power Automate for all employee onboarding, offboarding and improving joiner-leaver record management.
- Daily Tasks: Code debugging and ensure smooth workflow
- Ensured continuous system operation and reduced downtime
- Built customized workflows and forms to meet client-specific operational needs
- Enhanced internal productivity by implementing tailored workflow solutions
- Ensured application and data security compliance across different platform and streamline.

EDUCATIONAL BACKGROUND

University of Plymouth | Sep 2023 - Dec 2025

- BSC(HONS) COMPUTER SCIENCE (CYBER SECURITY)
- Graduated with Upper Second Class

Peninsula College Malaysia | Jan 2021 — Apr 2023

- DIPLOMA IN COMPUTER SCIENCE
- Graduated with First Class
- CGPA: 3.53

CONFERENCE PAPER

- Final Year Project - CloudChain: Integrating Blockchain Systems with MANET technology
 - Integrated Mobile Ad Hoc Network (MANET) with Blockchain technology to enhance decentralized communication and data security.
 - Improved blockchain security through a custom database extension module, reducing data tampering risks.
 - Optimized MANET scalability and performance, increasing network efficiency and stability.

SKILLS

Technical: IBM QRadar, PRTG Network Monitoring, Palo Alto XSOAR, Microsoft Tools, PowerApps, SharePoint, Power Automate, Visual Studio, MongoDB

Spoken languages: Mandarin, English, Malay.

CERTIFICATION

Feb 2025 - Feb 2028 CompTIA Security+ CE Certification
